

Survey of Case Management Services for Older Adults in Dane County January 1, 2017 – August 31, 2017 Synopsis

Background

Through contracts with purchase of service (POS) agencies, Dane County Department of Human Services provides publicly-funded case management services for older adults. Case management services in Dane County are provided through a network of 15 geographically-based senior focal points.

Primary Goal

The primary goal of case management services is to provide older adults with the support, resources, and community services that they need to safely remain in their own homes and communities. Case managers assist with the assessment of individual needs and the coordination of a variety of services – from home chore and personal care to assistance with health insurance and prescription drug plans.

Funding

Case management services are funded primarily with General Purpose Revenue (GPR). A small amount of 2017 funding (\$10,000) came from State Health Insurance Assistance Program (SHIP) funds which are Federal dollars from the Centers for Medicare and Medicaid Services (CMS), passed through the State Department of Health Services (WDHS) to counties to provide outreach to low-income older adults for assistance with issues involving Medicare/Medicaid, enrollment in assistance programs to help off-set the cost of Medicare premiums (like LIS – Low Income Subsidy or Extra Help), and any other issue related to Medicare. In Dane County, SHIP funds are used to provide this outreach through five (5) of the senior focal point case management programs.

Dane County Department of Human Services has a long history of investing in and supporting the Senior Focal Point network, which offers a unique opportunity to provide community-based programs and services for seniors living in Dane County. Case management is a vital component of the available service mix. Local municipalities and towns of the 15 Senior Focal Points also make significant investments in this program; during 2017, Dane County provided 40% of the total program budgets.

Eligibility

In order to receive County-funded services, clients must be Dane County residents age 60 and older, live in their own home or apartment or home of a family member, and have an income below 240% of the Federal Poverty level.

Study

The purpose of the survey was to measure client satisfaction of case management services with the goal of using this input in order to improve program efficiency and ensure the program is effectively helping senior adults.

Measures

The mail version of the Case Management Survey of the Administration on Aging, Performance Outcome Measures Project (POMP), served as the base instrument. That instrument, developed beginning in 2002, has been used in looking at performance nationally. Using it for this study allowed for comparison with national and regional data available at <http://www.agid.acl.gov/>.

The Case Management Survey examines the services that were provided, recipients' satisfaction with those services, and the ways they have been helpful. Revisions to the Dane County version of the survey were made in 2017 to update the list of services coordinated.

Translation

The survey was made available in Spanish and designed so that the form had both the English and Spanish versions side-by-side.

Survey Population

The survey population was all clients served between January 1, 2017 and August 31, 2017 whose cases were either open or had been closed less than 60 days and who had received case management services. Persons whose cases were closed as they were deceased or had moved out of the service area were excluded. A random sample of this population was pulled.

Survey Method

A total of 1,186 survey forms were mailed October 13-16, 2017. Surveys were sent out in DCDHS Department envelopes. A postage-paid, self-addressed return envelope was included.

Response Rate

The overall response rate for the 403 useable returned surveys was 35.7%; a response rate of 20% is considered acceptable for a one-time mail survey.

Due to the range of response rates and to reflect the overall status of the program, a random sample of 240 surveys was pulled. A sample size of 317 was required for a confidence level of 95% but this was limited to 240 by the lower response rates of Stoughton Area Senior Center and Sugar River Senior Center; thus the confidence interval (margin of error) was ± 5.89 rather than the desired ± 5 .

Findings

The full report may be found on the County web site at: <https://danecountyhumanservices.org/reports.aspx>. Briefly, some of the findings include:

- Survey respondents indicated their case managers treated them with respect (98%), returned their telephone calls in a timely manner (92%), explained services in a way they could understand (95%), and involved them in discussing and planning their services (92%).
- Slightly more than half (58%) of the respondents indicated their case manager developed a care plan for the services they needed, with the majority (62%) of those indicating they received a copy of the care plan.
- Persons of Color (96%) were significantly less likely than Whites (100%) to indicate their case manager treated them with respect.
- Respondents from the Greatest Generation (born 1900-1928, age 89+) were least likely to indicate they and their case manager worked together to decide on the services they needed.
- In examining benefits of case management services, survey respondents indicated their case managers helped them get services they did not have before (87%), their situations were better because of their case managers' help (96%), and the case management services helped them continue to live where they chose (91%).
- Nearly 97% of survey respondents were satisfied with the case management services they received.
