# History and Process

## History

At five-year intervals since 1980, Dane County youth in grades 7-12, have been surveyed regarding their opinions, concerns, attitudes, behaviors and experiences. The purpose of the survey is to provide area educators, service providers, parents, policy-makers and funding bodies with accurate and up-to-date information to be used as a basis for the planning and development of youth programs, services and public policies. Based on reports from community agencies, it is estimated that the youth assessment has been instrumental in capturing thousands of dollars in state and federal grants annually since 1980.

Each survey has been a collaborative effort involving the Dane County Youth Commission, area schools, non-profit youth-serving agencies, and various public and private funding sources.

## DCYA Process for 2005

Planning for the Dane County Youth Assessment 2005 began in the spring of 2004. The Youth Commission created a subcommittee, the Youth Assessment 2005 Oversight Committee, to oversee all phases of planning, design and implementation of the project. Besides working with area agencies and schools to develop the survey questionnaire, the subcommittee identified funding and contracted with Brian Koenig (of K12 Associates) to design the final survey, provide data analysis, and present a series of reports.

In the spring of 2004, representatives from 14 of the county's 16 school districts, representing 92% of the students in Dane County, and 5 funding organizations met over a three-month period to determine the format and content of the 2005 questionnaire. During this time, the partners (districts and funders) critically reviewed the survey. Questions were retained, modified or added to reflect emerging trends and interests.

In the fall of 2004, representatives from the participating schools were trained to administer the survey to their students. Brian Koenig was responsible for the distribution, and later, the collection of the survey response forms.

Completion of the survey was voluntary and anonymous by each student. All families in every district were given opportunities to review the surveys before their student participated in the process.

Once the surveys were completed and collected, data coding and analysis occurred throughout the early months of 2005, leading to individual reports for each school district and the following surveys highlights. In the fall of 2005 there will be a series of focused reports covering specific topics such as nutrition, bullying at school, tobacco and alcohol use.

The Dane County Youth Assessment 2005: 9<sup>th</sup>-12<sup>th</sup> Grade Survey Highlights summarizes student responses to select survey items and examines how a variety of personal, social and environmental factors relate to both positive and problematic youth outcomes. The addendum to this report, the Dane County Youth Assessment 2005: 9<sup>th</sup>-12<sup>th</sup> Grade Data Summary, provides a full summary, by grade level, of students' responses to all items on the survey. These data also provide additional opportunities for further analysis.

The 2005 assessment marks the sixth time the Youth Commission has facilitated and coordinated an opportunity for 7<sup>th</sup>-12<sup>th</sup> grade youth in Dane County to voice their opinions, needs, concerns, interests and aspirations. The 2005 Assessment provides an opportunity to track the trends and changes encountered by our middle and high school youth over a twenty-five year period. The data is encouraging in a number of areas and identifies challenges in others. We hope that youth-serving agencies and institutions, parents and youth will see where we have been in the past, will appreciate the successes and challenges of today and will be inspired to build on the past and present to create an even brighter future for Dane County youth.

# Acknowledgements

The Dane County Youth Assessment is truly a community-wide collaborative project.

The Dane County Youth Commission, through its contract with Brian Koenig, worked with 14 Dane County school districts and the project's funders to develop the content and format of the questionnaire.

The following school district staff were instrumental in coordinating the administration of the survey in their respective school districts. These people deserve a great deal of thanks for their efforts, making this project a reality.

Thank you!

## Key School District Staff

Kim Hegstrom,  
**Belleville** School District

Kyle Hornicke,  
**Cambridge** School District

Jacquie Schue,  
**Deerfield** School District

Kurt Kiefer & Jill Brown  
**Madison** Metropolitan School District

T.J. Hanson  
**Marshall** School District

Jill Runde,  
**McFarland** School District

Lynn Reining,  
**Middleton-Cross Plains** School District

Aaron Tarnutzer  
**Monona** Grove School District

Carol Nickles,  
**Mount Horeb** School District

Christy Scheppelman  
**Sun Prairie** School District

Suzanne Daering  
**Verona** Area School District

Brian Dean,  
**Wisconsin Heights** School District

Dr. Dorothy Espelage, Counseling Psychology professor at the University of Illinois, and her graduate students were responsible for tabulating nearly 25,000 surveys.

Ron Biendseil provided staff support and coordination for all phases of the project.

Funding for this project was provided in part by:

- Dane County Youth Commission
- Dane County Division of Health
- Dane County State Incentive Grant
- United Way of Dane County
- Tobacco Free Dane County
- Participating Dane County school districts (14)

# Understanding DCYA 2005 Data Summary

---

This document presents students responses to all 189 items on the 2005 assessment. Responses to each item are reported by grade level.

These data were gathered in the fall of 2004 from 9<sup>th</sup>-12<sup>th</sup> grade students attending 14 Dane County school districts.

The Survey was administered on a voluntary basis to all students who chose to participate during the school day. Youth who did not attend school on the day of the survey did not get measured. Also, students who were being educated in alternative settings, such as at home schools, mental health or drug treatment facilities, juvenile detention or other non-school environments were not surveyed.

The numbers presented in this High School Data Summary are the tabulation of all students who provided valid responses to the DCYA 2005 survey. There were 15,650 valid surveys used as the basis for this report. Slightly less than 2% of surveys collected from each school were considered invalid and not used in the tables follow.

The number of responses per item below will vary based on the number of students who actually answered that item or provided a valid response. This "missing data" is not included in the tabulations.

# Using the Report Tables

All tables in the following report are constructed in the same manner. Each table summarizes the responses for **one particular survey item** for either all high school students (grades 9-12).

These tables are intended to provide as much information as possible in an easy-to-understand format. Below is a description of each element in the table.

**Special Education (Sample Table)**

Grades 9-12		Grade level							
		9th		10th		11th		12th	
		% of Group	# of Students	% of Group	# of Students	% of Group	# of Students	% of Group	# of Students
Enrolled in special education	No	89.1%	1927	89.3%	1954	89.5%	1729	88.7%	
	Yes, full time	3.9%	85	4.2%	91	3.9%	75	4.7%	
	Yes, part time	7.0%	151	6.5%	143	6.5%	126	6.6%
